A PROACTIVE APPROACH TO PRODUCT SAFETY TESTING

Ocean Laboratories offers cost-effective product safety testing services to help speed the time to market for your products. We are accredited to test luminaires and equipment for use in lighting products to ANSI/UL safety standards in the United States and Canada. Through our proactive, pre-compliance strategy and personalized customer service approach, Ocean Laboratories will guide you through the testing process to keep your projects on track and on budget.

STANDARDS:

- ANSI/UL 1598 and CAN/CSA C22.2 No. 250.0
- CAN/CSA C22.2 No. 250.4
- CAN/CSA C22.2 No. 250.13
- ANSI/UL 153
- ANSI/UL 8750

PRODUCT TYPES:

- Indoor Luminaires
- Outdoor Luminaires
- Residential Luminaires
- Commercial Luminaires

WHY OCEAN LABS?

- 10+ years experience in product safety testing
- Competitive pricing
- Proactive, pre-compliance strategy
- Timely turnaround

PRE-COMPLIANCE EVALUATION:

The fastest and most cost-effective route for product safety compliance is by designing with safety standards in mind. Utilizing more than 10 years of safety compliance evaluation experience, our team will help you identify any preliminary design bottlenecks prior to safety submittal, helping to minimize non-compliance and the resulting costly resubmittals.

ACCREDITATION:

(UL-Product Safety) Ocean Laboratories provides product testing, and evaluation for UL product safety in United States and Canada.

UNDERWRITERS LABORATORIES:

Ocean Laboratories has received Third Party Data Program accreditation. For complete testing scope and capabilities, please contact us today.
